

Secure AI-powered productivity with Microsoft 365

Work smarter.
Collaborate faster.
Stay protected.

The productivity capacity gap is real.

80%

of the global workforce report lacking enough time and energy to get their work done.¹

As AI promises to increase business productivity, organizations are facing three critical challenges:

1

2

3

Balancing AI productivity improvements with secure oversight

Integrating AI into existing workflows without disrupting operations or overwhelming lean teams

Protecting sensitive data as AI systems access more information across devices, apps, and cloud environments

Xpress along with Microsoft 365 offers the opportunity to consolidate tech platforms while securely adopting AI solutions that can help your organization close the productivity gap across your organization.

From idea to impact—securely.

Reach a new level of productivity across your organization without compromising security. You need a solution that enables productivity across your organization.

Maximize individual and team productivity.

We start by equipping individuals with powerful productivity tools then amplify their impact by enabling teams to collaborate in real time and in the same apps they already use. From desktop to web and mobile, **Microsoft 365** ensures your teams have the tools they need exactly when and where they need them.

Real customers seeing real benefits

“If you have gaps in your systems, you can find creative ways to plug them using Copilot. It’s been incredibly helpful for us.”

—Dominic Comley, Director of Global Operations, Joos
