# Give your workforce the tools to produce more, together

- Enhance security and streamline access with multifactor authentication and single sign-on.
- Safeguard your data and help keep files secure and accessible across devices.
- Reduce security risks from phishing, malware, and spam.
- Remotely wipe data from lost or stolen devices.

# The security you need to enhance productivity

With remote and hybrid work now standard for many businesses and employees accessing applications from multiple devices, security has never been more important.

A threat actor sends the project owner a phishing email. Outlook blocks the phishing attempt.

The document is shared securely on Teams meetings as the project progresses.

Project team members can access and contribute to the document. It remains secure in OneDrive, with their access verified using MFA.

### As a Microsoft Partner, we can:

### Assess

Allow our experts to evaluate your AI-readiness and uncover opportunities for seamless integration of Microsoft 365 Copilot.

## **O** Analyze

Collaborate with us to define your unique business goals and challenges that Microsoft 365 can address.

## (O)
